About

I am a student with a strong interest in Artificial Intelligence and Machine Learning, and I enjoy learning new technologies. I like exploring new ideas, thinking creatively, and understanding how intelligent systems work. I am motivated to apply my knowledge through hands-on projects and continuously improve my skills by learning and experimenting.

Skills

Technical Skills: Python, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Keras, Hugging Face, Power BI, Tableau, MS Excel, Matplotlib, Seaborn, Plotly, Git/GitHub, HTML/CSS, Google Colab

Business & Soft Skills: Problem Solving, Communication, Teamwork, Leadership, Analytics, Critical Thinking, Data-Driven Decision Making, Research & Analytical Curiosity, Creativity in Modeling

Projects

SafeHomeCam | *Python, Computer Vision, Motion Detection* **Aug 2025 – Nov 2025**

- Developed an AI-based home surveillance system using computer vision for real-time video monitoring and security enhancement.
- Implemented motion detection algorithms to identify suspicious activity and reduce reliance on manual surveillance.
- Designed a basic alert mechanism to notify users instantly, improving response time and overall home safety.

NLP – Hotel Review Sentiment Analysis | *Python, NLP, Machine Learning* **Jun 2025**

- Built an NLP-based sentiment analysis system to classify hotel reviews as positive or negative.
- Applied text preprocessing techniques such as tokenization and stop-word removal for cleaner data analysis.
- Extracted actionable insights from customer feedback to support service quality evaluation and decision-making.

David AI | *Python, AI/ML, Automation* **Jan 2025 – Feb 2025**

- Designed an AI-powered virtual assistant for task automation and interactive user communication.
- Implemented intelligent workflows to improve response accuracy and system efficiency.
- Focused on usability and conversational flow, enhancing overall user experience and engagement.

Experience

NSMEDIA Solutions **Jul 2022 – Aug 2022**

UI/UX Design Intern

- Worked on UI/UX design tasks using Figma and Adobe Photoshop for digital and web-based projects.
- Assisted in designing visual creatives, layouts, and interface mockups based on real client requirements.
- Gained exposure to real-world problem understanding, requirement analysis, and design thinking.
- Collaborated with the team to refine designs based on feedback and usability considerations.
- Developed a foundational understanding of industry workflows, deadlines, and professional communication.

Education

NMIMS University **2024 – 2028**

Integrated MBA + B.Tech — Computer Engineering

- A unique dual-degree program combining technical expertise in Computer Engineering with core business knowledge.
- Emphasizing analytical thinking, system design, and strategic decision-making, while fostering innovation through a multidisciplinary curriculum.

Mumbai University **2020 – 2023**

Diploma in Computer Engineering

- Studied core computer engineering subjects including programming, networking, and systems.
- Gained practical skills through lab work and projects.

Certifications & Achievements

Smart India Hackathon (SIH) 2025 | *Selected at College Level (Round 1)* **Sep 2025**

Data Analyst Certification | *ExcelR Solutions* **Feb 2024**

Prompt Engineering for Everyone | *Cognitive Class (IBM Developer Skills Network)* **Feb 2024**

Accounting Fundamentals | *TCS iON* **Feb 2024**

Cybersecurity Job Simulation | *JPMorgan Chase (via Forage)* **Nov 2023**

Generative AI with Large Language Models | *Coursera* **Mar 2024**
